

WORLD ENVIRONMENT DAY – 5th June, 2021

Marked annually on 5th of June World Environment Day is observed to generate awareness about the significance of nature. The Legal and Social Services Committee under the constant guidance of Hon'ble Vice Chancellor Prof. Dr. V.C. Vivekanandan and support of Dr. Balwinder Kaur, Faculty Co-ordinator, LSSC, HNLU decided to commemorate the World Environment Day by a mix of on-field and off-field events in order to take a step further towards building a greener planet. The United Nations declared 2021-2030 as the Decade on Ecosystem Restoration with the slogan of “Reimagine, Recreate, Restore”.

We all are aware that immediate actions need be taken to save the environment and create an eco-friendly sustainable Earth. As said “*Charity begins at home*”, this year the members of the committee resolved to promote the cause of the environment by becoming agents of change from their homes. They planted saplings of different varieties of herbs and shrubs in order to create a greener home. The committee believes that these small endeavours shall make big difference in the years to come and therefore we are hopeful of achieving a greener tomorrow soon. Below are the glimpses from the plantation drive: -
