Course Name	The Code of Criminal Procedure, 1973	No. of Credits	4
Course Code	NA	Session duration	55 Minutes
No of Contact Hours (Week)	50 lecture + 10 Tutorial= 60	Pre-requisite	NIL
Course Objective & Pedagogy	<p>In the adversarial criminal justice system, the protection of individual rights and liberty against atrocities would become a huge cause of concern. Criminal law is divided into two parts viz., substantive and procedural. Making the right balance between two different ideas is a very difficult task to do. Hence, it is very important to have a balanced criminal procedure, which is based upon sound principles of law and also promotes the cherished ideals of our constitution. Human rights can only be promoted when domestic criminal justice systems are based upon the idea of equity, justice and good consciences. The criminal procedure code is designed to look after the process of the administration and enforcement of the criminal law. Substantive rights would have no meaning if proper recourses are not available in case of their infringements. It provides not only machinery for the detection of crime but also an enforcement mechanism for its implementation.</p> <p>Course objective :</p> <ul style="list-style-type: none"> • To understand the nature and scope of the code. • To analyze the drawbacks of complicated procedural requirements of the code. • To develop necessary understanding of procedural knowledge of court proceedings. • To develop a necessary skillset to assist the court and law enforcement agencies at the time of trial and investigation respectively. 		

	The entire course is divided into 60 lectures in which students will learn about the basic procedural knowledge of court proceedings and its day-to-day challenges. Debate, discussions, brainstorming sessions, critical analysis and paper writings will be used to cover up the topics.

COPYRIGHT LAW (HONOURS PAPER)
SEMESTER VII | B.A.LL.B. (Hons.)
SYLLABUS (SESSION: JULY-DECEMBER)

Faculty Name	Dr. Ankit Singh/Ms. Garima Panwar/Ms. Urvi Shrivastava	Year/ Semester	4/VII
Course Name	Copyright Law	No. of Credits	6
Course Code	NA	Session Duration	60 Minutes
No of Contact Hours	50 Lectures + 10 Tutorials =60 hours	Pre-requisite	None
Introduction, Course Objective & Pedagogy	<p>Copyright is a type of intellectual property that gives its owner the exclusive right to make copies of a creative work, usually for a limited time. The creative work may be in a literary, artistic, educational, or musical form. Copyright is intended to protect the original expression of an idea in the form of a creative work, but not the idea itself. When people create original works, they are protected by copyright law. This law lasts for a limited time, and it provides the work's creator with certain exclusive rights. The goal of copyright law is to protect created works from theft. In turn, this protection is meant to encourage creativity and the continued creation of new works that will ideally be made available to the public. A copyright is subject to limitations based on public interest considerations, such as the fair use doctrine across the globe.</p> <p>Some jurisdictions require "fixing" copyrighted works in a tangible form. It is often shared among multiple authors, each of whom holds a set of rights to use or license the work, and who are commonly referred to as rights holders. These rights frequently include reproduction, control over derivative works, distribution, public performance, and moral rights such as attribution.</p> <p>Copyrights can be granted by public law and are in that case considered "territorial rights". This means that copyrights granted by the law of a certain state, do not extend beyond the territory of that specific jurisdiction. Copyrights of this type vary by country; many countries, and sometimes a large group of countries, have made agreements with other countries on procedures applicable when works "cross" national borders or national rights are inconsistent.</p> <p>This course is an attempt towards imparting knowledge of various aspects of Copyright Law:</p> <p style="text-align: center;">CO1- Providing an understanding of Concept of Copyright Law.</p>		

	<p>Justification of Copyright as an intellectual property. Historical development of Copyright Law with certain exceptions and limitations;</p> <p>CO2 - Developing skills of analyzing of various concepts under Copyright Law;</p> <p>CO3- Improving the students' level of comprehension and interest in engaging with personal laws and debating the same from the viewpoint of rights and well as personal liberty;</p> <p>CO4- Providing an understanding of Copyright in diverse IP conventions through the legal perspective.;</p> <p>This subject requires teaching to be a combination of theoretical foundation with practical application. The contact hours will be utilized in catering a blend of instruction, discussion, and brainstorming sessions. The enrolled students will be encouraged to participate in classes via minor assignments in the form of quiz, MCQs or addressing an issue based on facts.</p>

Introduction, Course Objective & Pedagogy	<p>The Banks are the backbone of any economy across the world. In Indian economy, Banks and the banking system have been evolved into a vital socio-economical institutions in the modern age. This has been largely influenced by the socio-political and economic changes that have been witnessed at large. As a developing state, India has been influenced by these developments which led to the evolutionary effect on banking structure, policies, patterns and practices. A study of these developments reveals the development from banking as a generic entity to specialized one. One could quote Commercial banks, Cooperative Banks, Development Banks and Specialized Banks as a paradigm. The evolutionary process still continues with global phenomenon of liberalization. This has witnessed the entry of Foreign Banking Companies in the Indian market leading to deviation in the banking policy. 		Semester	VII and IX
Course Name	Comparative Constitutional Law	No. of Credits	4
Course Code	NA	Session Duration	60 Minutes
No of Contact Hours	60 hours	Pre-requisite	Basic understanding of Constitution of India.
Introduction, Course Objective & Pedagogy	<p>The field of Comparative constitutional law has grown immensely over the past couple of decades. Once a minor and obscure adjunct to the field of domestic constitutional Law, Comparative constitutional law has now moved front and centre. Driven by the global spread of democratic government and the expansion of international Human Rights Law, the prominence and visibility of the field, among judges, politicians, and scholars has grown exponentially. The Constitution, essentially an organic document, is said to be always in the process of making and developing. The judicial process of constitutional interpretation engrosses a technique of adapting the law to meet changing social mores. Constitution, being the fundamental law, an insight into its novel trends is indispensable for a meaningful and evocative understanding of the legal system and processes.</p> <p>The students, who have acquired the basic knowledge of Indian Constitutional Law, should be exposed to the comparative analysis of the same. Conspicuously, rubrics under this paper require modification and updating from time to time.</p> <p>The main objective of Course is:</p> <p>CO1- to study from a comparative perspective—legal structure and concepts (such as, basic rights, rule of law, systems of governance, judicial review, so on and so forth) that are found in cons law across the important jurisdictions in the world;</p> <p>CO2 -to acquaint students with the constitutional and administrative systems of governance of a few countries, in particular, the United States of America, the UK, Australia, Canada and few other emerging constitutions along with the Indian Constitution</p> <p>CO3- to be benefitted from deeper understanding of the doctrines and values underlying the provisions and principles from various constitutional systems.</p>		

	This paper requires theoretical foundation. The contact hours will be utilized in catering a blend of instruction, discussion, and brainstorming sessions. The enrolled students will be encouraged to participate in classes via day-to-day challenges of the constitution and will try to discuss best solution through comparative analysis.

Introduction, Course Objective & Pedagogy	<p>Introduction</p> <p>The concept of crime has been a highly debatable issue and the subject matter of criminology also varies accordingly both in its nature and scope because broadly speaking criminology is the systematic study of crime in all its aspects. Criminology and criminal policy are interdependent and mutually support one another. Criminology is a branch of knowledge concerned with those particular conducts of human behaviour which are prohibited by society. It is, therefore, a socio-legal study which seeks to discover the causes of criminality and suggest remedies to reduce crimes. Therefore, criminology seeks to study the phenomenon of criminality in its entirety.</p> <p>The primary objective of criminology is to study the sequence of law making, law breaking and reaction to law-breaking from the point of view of efficacy of law as a measure of crime control. It focuses on causation of crime, various factors that leads a person to criminality and prevention of crime and criminals. It is a field of study which is related to variety of branches such as sociology, economics, biology, psychology, typography, political setup, statistics etc. Therefore, it is interdisciplinary in nature. The ultimate objective of criminology as a branch of study is “to curb criminality within the human being by effective administration of criminal justice and not the humanity within the criminal.”</p> <p>The course talk about the theories of punishment as well as the mechanism for the enforcement of the same. The latest development happen in the area of victim rights are also taken into account in view of changing course of criminal jurisprudence.</p> <p>Course Objectives The Course aims to:</p> <p>CO1: Clarify the purpose and role of criminology as a separate branch of study.</p> <p>CO2: Understand the correlation between deviant behaviour and law as a process of crime control.</p> <p>CO3: Highlight the role and relevance of theories of criminology in relation to crime in society.</p>		

	<p>CO4: enable the students to understand the various theories of penology as well as reforms made thereunder.</p> <p>Pedagogy: This course will be administered through classroom teaching, internal assessments, discussion, and evaluation. Classroom interactions between students and teachers are considered as one of the practical aspects of imparting this course. Students will be encouraged to participate in question-answer sessions and they will be given opportunity to share their opinions, ideas, and critical views in the classroom which can help all the stakeholders for further improvements in teaching-learning processes and development of the curriculum.</p>
